PROFILE

Undergraduate Information Technology student at HUST with experience building domain-specific LLM data workflows for JR West and leading student communities. Seeking to build a practical, responsible AI builder community at HUST through the Claude Builder Club.

EXPERIENCE

JR West Internship Program
LLM Dataset Development Intern

Japan / Remote
03/2026 – 03/2027

- Worked in a two-person team to process 15 mixed-format railway PDF manuals, extracting text, OCR content from images, and tables with Docling and GiNZA.
- Extracted 3,000 candidate JR West-specific terms and contributed to the BERT-assisted extraction workflow.
- Co-built a review web application that presents extracted terms in a reviewer-friendly interface and stores review decisions for subsequent LLM fine-tuning data curation.
- Completed a railway field immersion in Japan (15 August–1 September 2026) to gain operational context and inform solution ideas.

LEADERSHIP & INTERNATIONAL COLLABORATION

Hedspi Nichibu Club
Vice President

Ha Noi, Viet Nam
07/2024 – 07/2025

- Planned and coordinated 5 academic events, Japanese-language study sessions, and cultural exchanges for a student club of approximately 40 members; coordinated task owners to support peer learning in the HEDSPI community.

Global Project-Based Learning, HUST & Shibaura Institute of Technology
International Project Participant

Vietnam / Japan
07/2025 – 08/2025

- Collaborated with Japanese students to develop Vietcom, a web platform that helps Vietnamese residents in Japan find communities, events, and useful local information.

SELECTED PROJECTS

Pet Center — Pet Care Management Platform
Next.js, React, TypeScript, Express.js, PostgreSQL (Neon)

[GitHub](#)

- Co-developed role-based workflows for pet owners, staff, veterinarians, and administrators, covering pet records, appointments, boarding, grooming, medical records, invoices, and payments; built with a modular Express API, PostgreSQL, authentication/authorization, validation, and Swagger documentation.
- Used Claude and Codex as AI-assisted development tools while designing and implementing Pet Center features.

TABELINK — Restaurant Discovery Platform for Japanese Residents in Hanoi
Next.js, React, TypeScript, NestJS, TypeORM, PostgreSQL (Neon)

[GitHub](#)

- Co-developed a bilingual, multi-sided product for Japanese diners, restaurant owners, and administrators, with restaurant discovery, map-based search, reservations, reviews, menu management, campaigns, analytics, verification badges, and role-based access.

EDUCATION

Hanoi University of Science and Technology (HUST)
B.Sc. Information Technology, HEDSPI Program | GPA: 3.53/4.0

Ha Noi, Viet Nam
09/2023 – Present

SKILLS & AWARDS

AI & NLP: LLM data curation, document processing, Docling, GiNZA, BERT
AI-assisted development: Claude, Codex
Full-stack: TypeScript, Next.js, React, NestJS, Express.js, PostgreSQL
Languages: Vietnamese (native), Japanese (JLPT N2, July 2026), English
Awards: Excellent Student, HUST (2024–2025); SCIC Finalist, SOICT HUST (2025)
